

GuardSpine

Cryptographic Proof for Every AI Decision

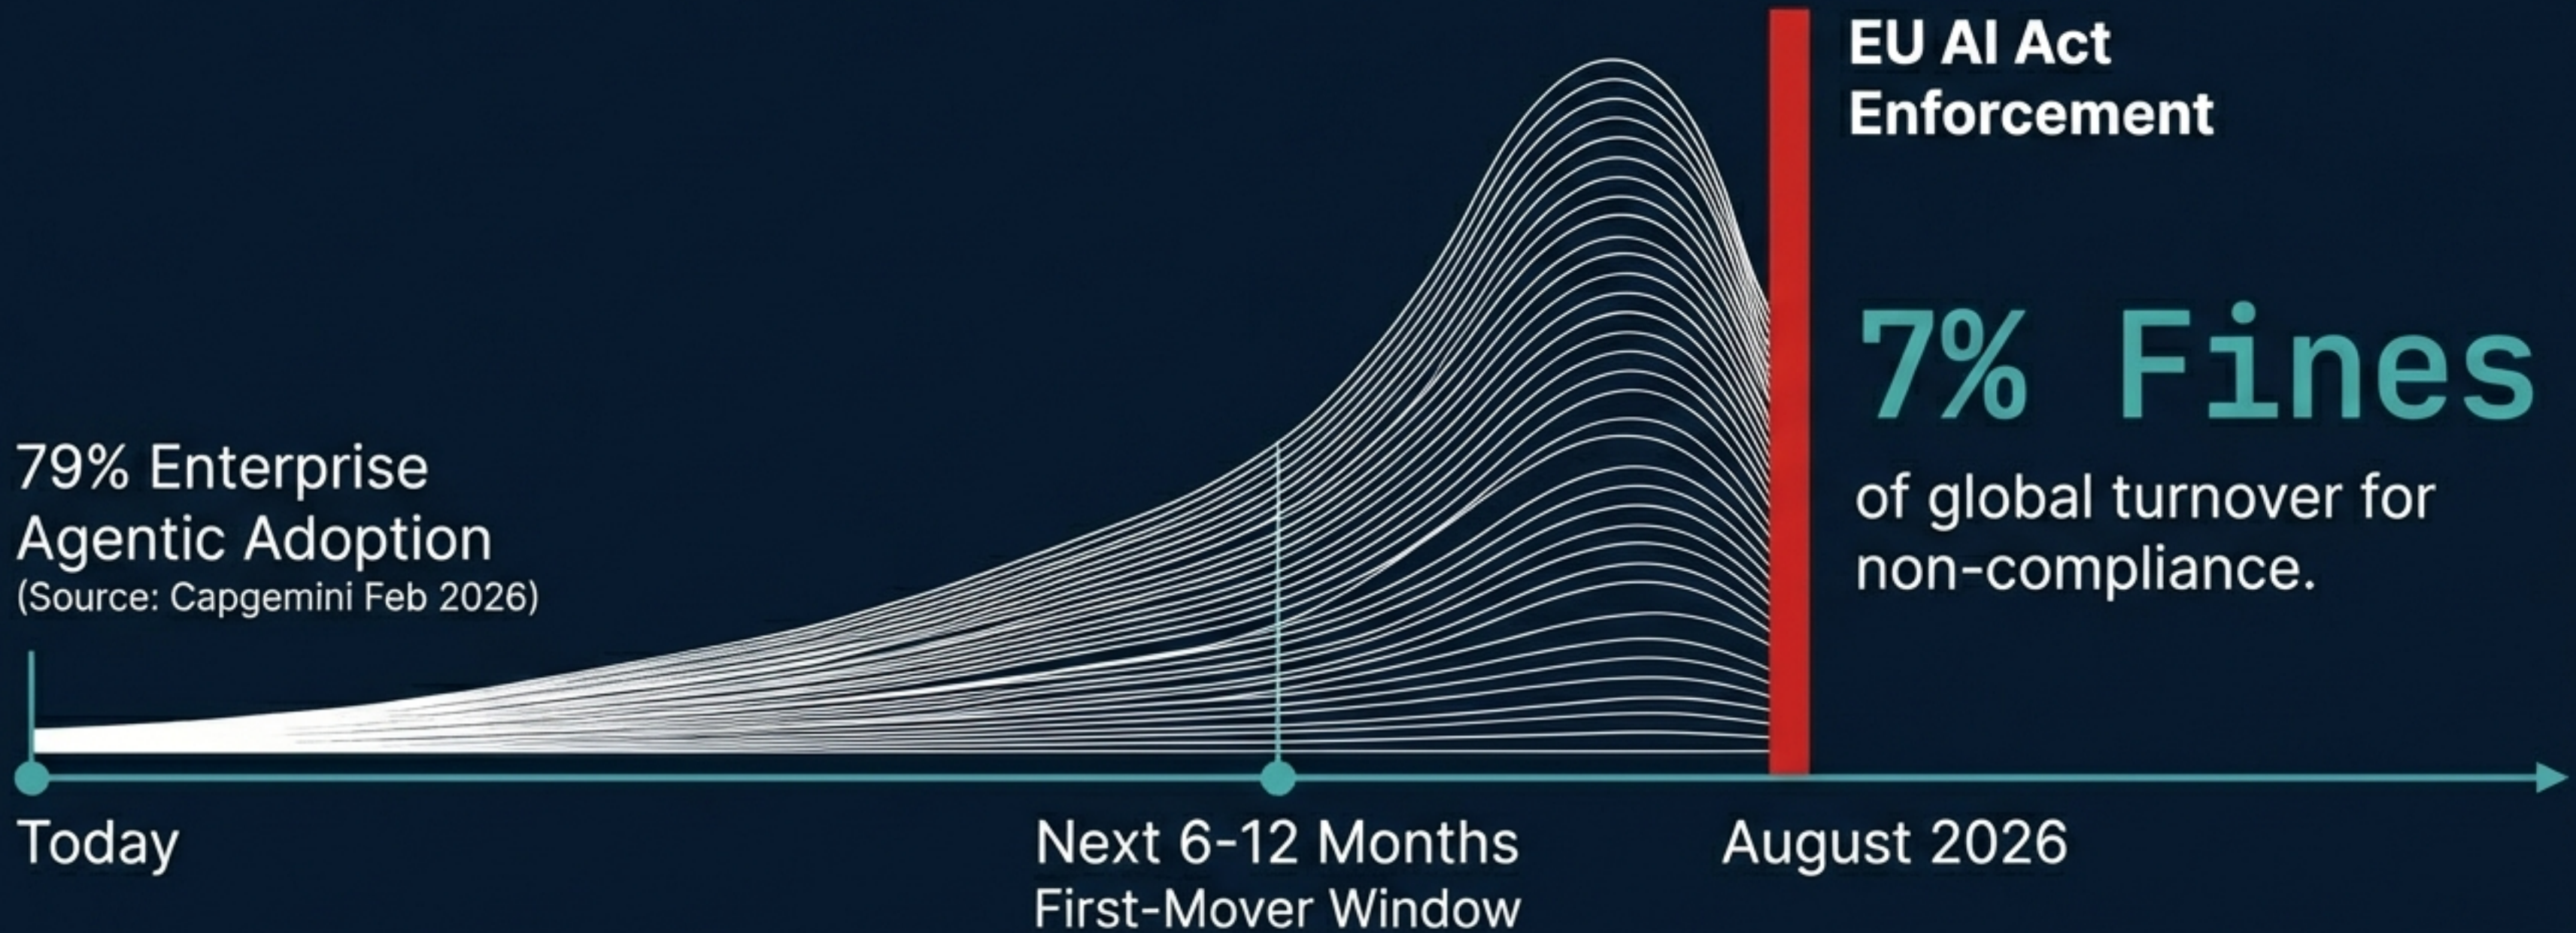

The governance spine for AI-generated code,
documents, spreadsheets, and images.

Every AI Decision Is a Liability Without Proof

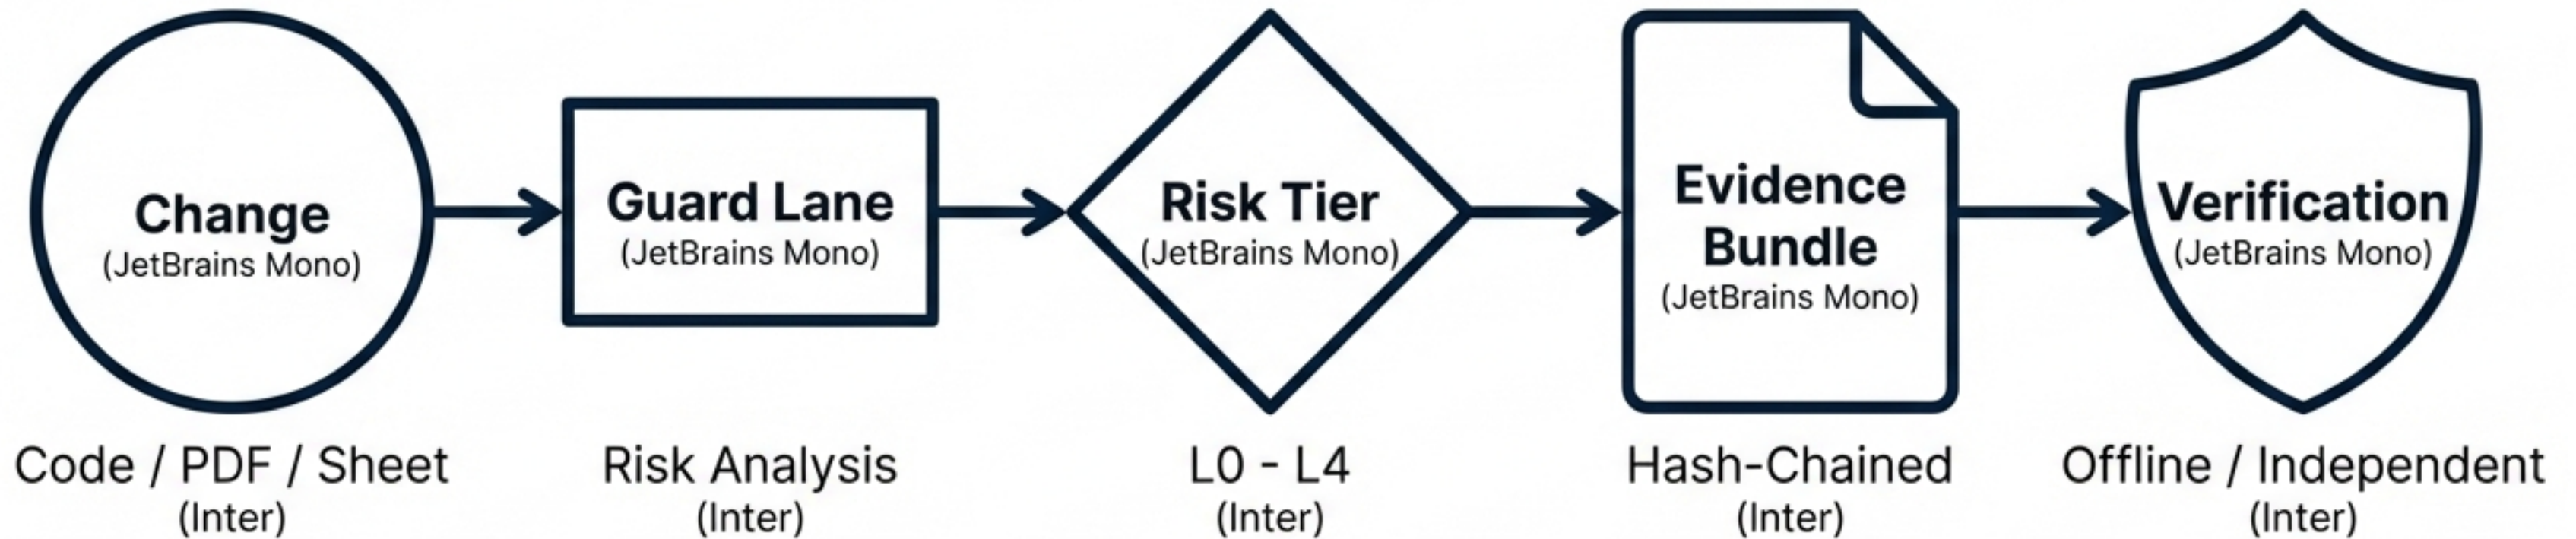

- **The \$51B Governance Gap:** Companies use AI for code, docs, and sheets, but existing tools only govern code (\$15B).
- **The Blind Spot:** No competitor governs documents, spreadsheets, or images.
- **The Risk:** Enterprises use AI to draft contracts and edit financial models today, but cannot prove who approved the changes or what the AI modified.
- **Regulatory Pressure:** SOX, HIPAA, and DORA now require tamper-proof audit trails for AI-assisted work.

The \$51B Governance Gap Opens August 2, 2026

We Answer One Question: “Are We in Control?” (Inter Tight)

Cryptographic Proof

We don't sell logs. We sell hash-chained evidence that is mathematically impossible to alter. (Inter)

Offline Verification

Anyone can verify bundles without trusting the vendor or having network access. (Inter)

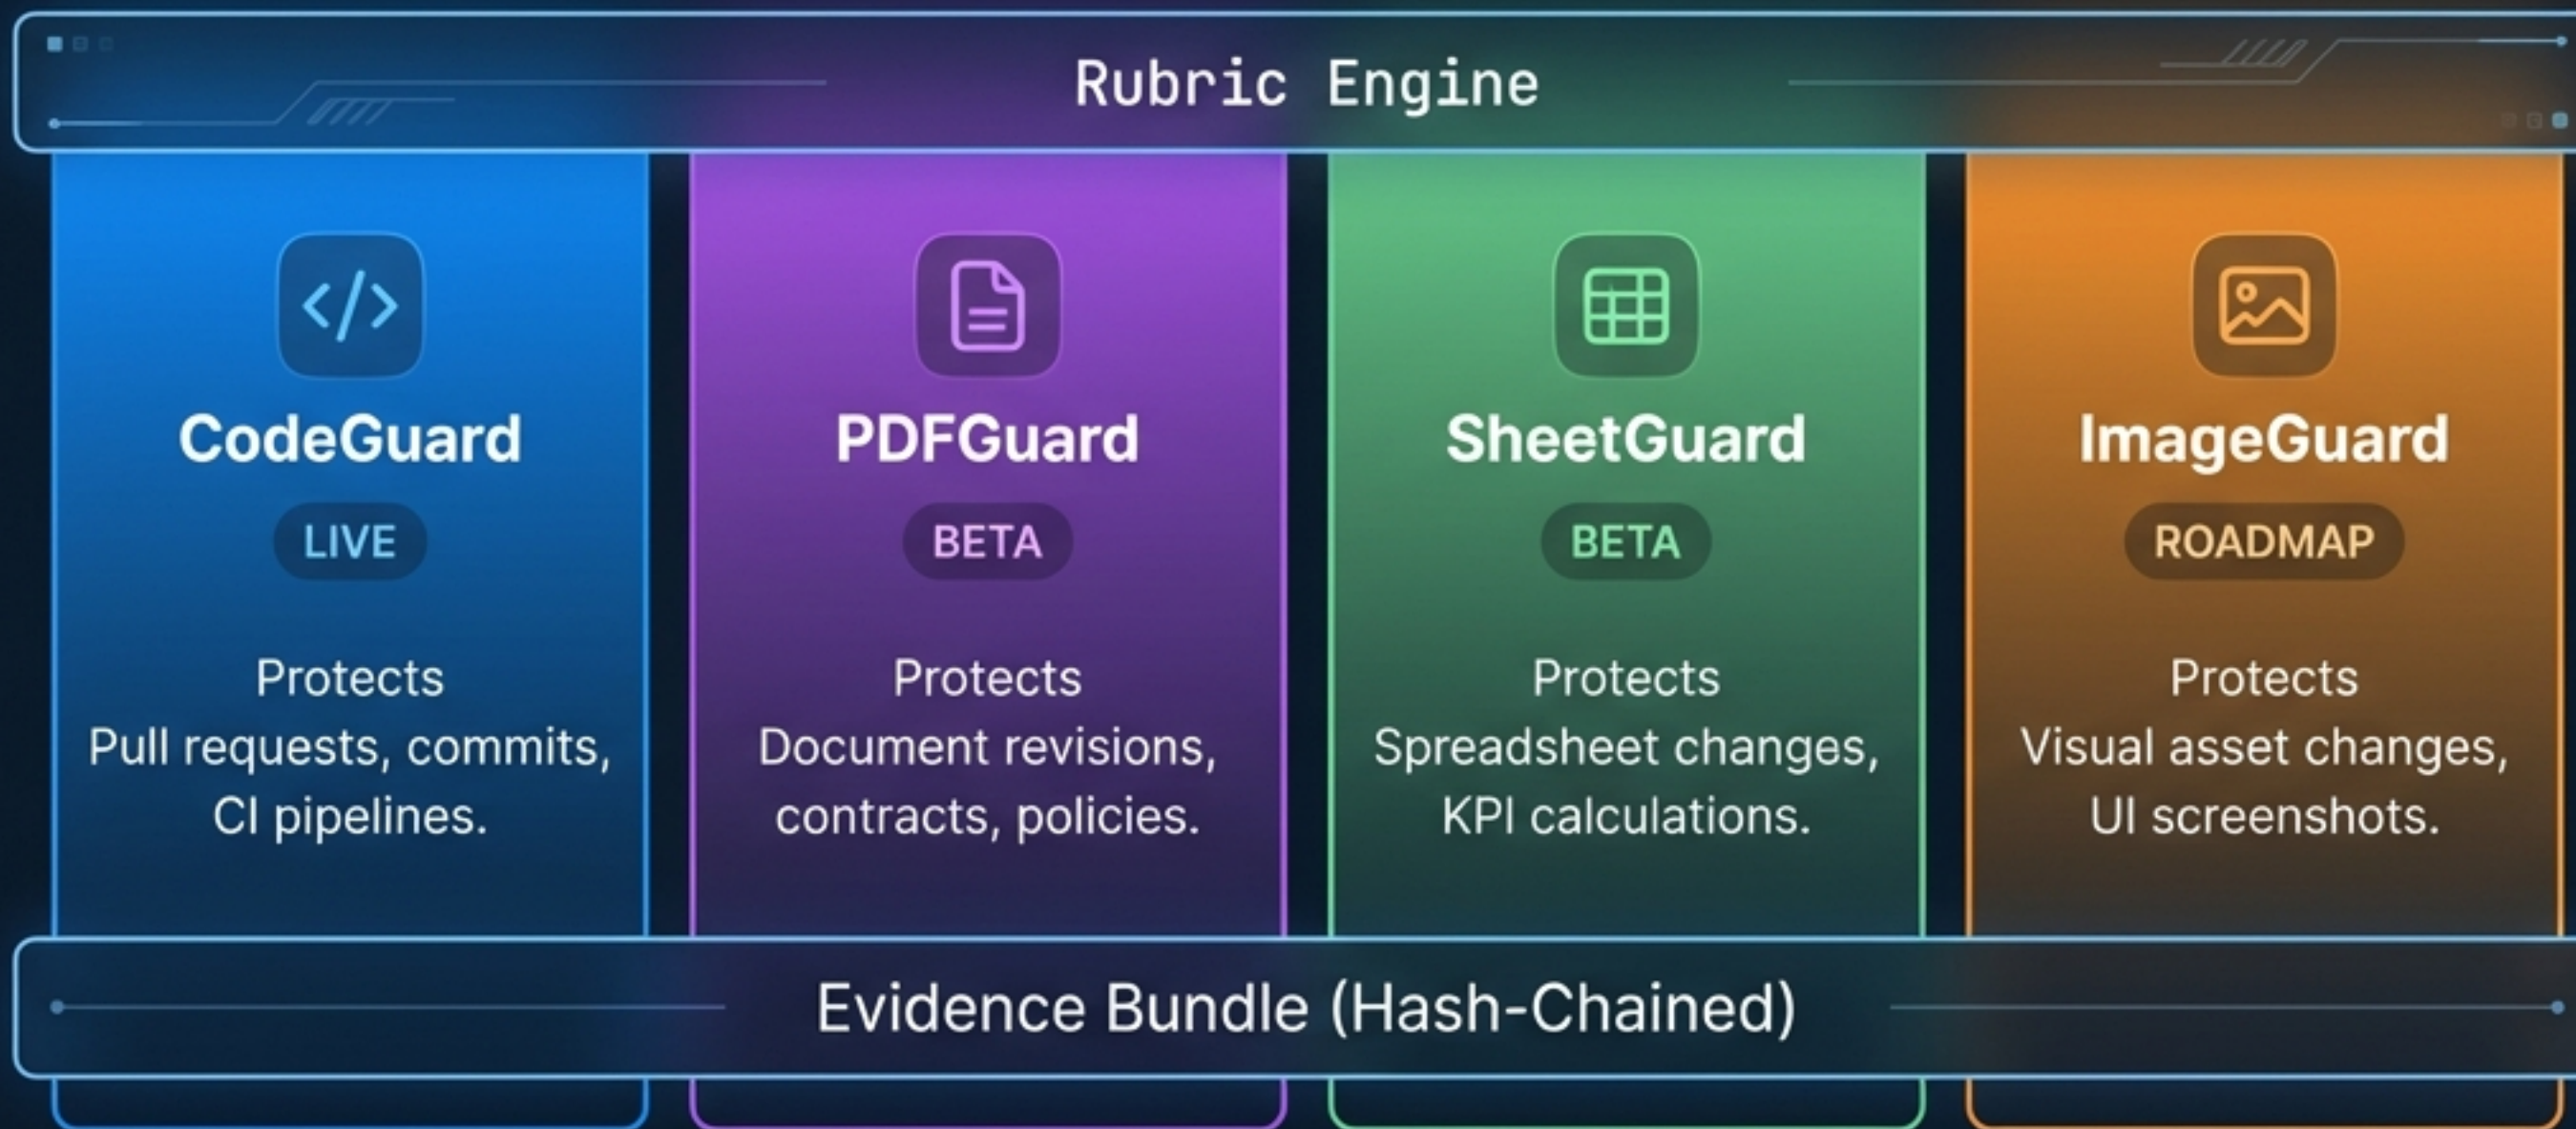

Unified Spine

One governance logic for every type of work artifact, not just code. (Inter)

We Guard What Nobody Else Touches

Every competitor stops at code. We govern the artifacts of the modern office.

Four Lanes Architecture

87-91% Gross Margins on Zero Inference Cost

BYOK (Bring Your Own Key): Customers supply their own LLM API keys.
GuardSpine pays zero inference costs.

Tier	Price/mo	Gross Margin	Feature Status
Free	\$0 JetBrains Mono	-- JetBrains Mono	7/7 features shipping now
Team	\$2,000 JetBrains Mono	87.5% JetBrains Mono	8-9/11 features, ships in 1-2 weeks
Organization	\$5,000 JetBrains Mono	90.0% JetBrains Mono	8-9/10 features, ships in 2-3 weeks
Enterprise	\$12,000 JetBrains Mono	91.3% JetBrains Mono	3-4/8 features, ships 8-12 weeks

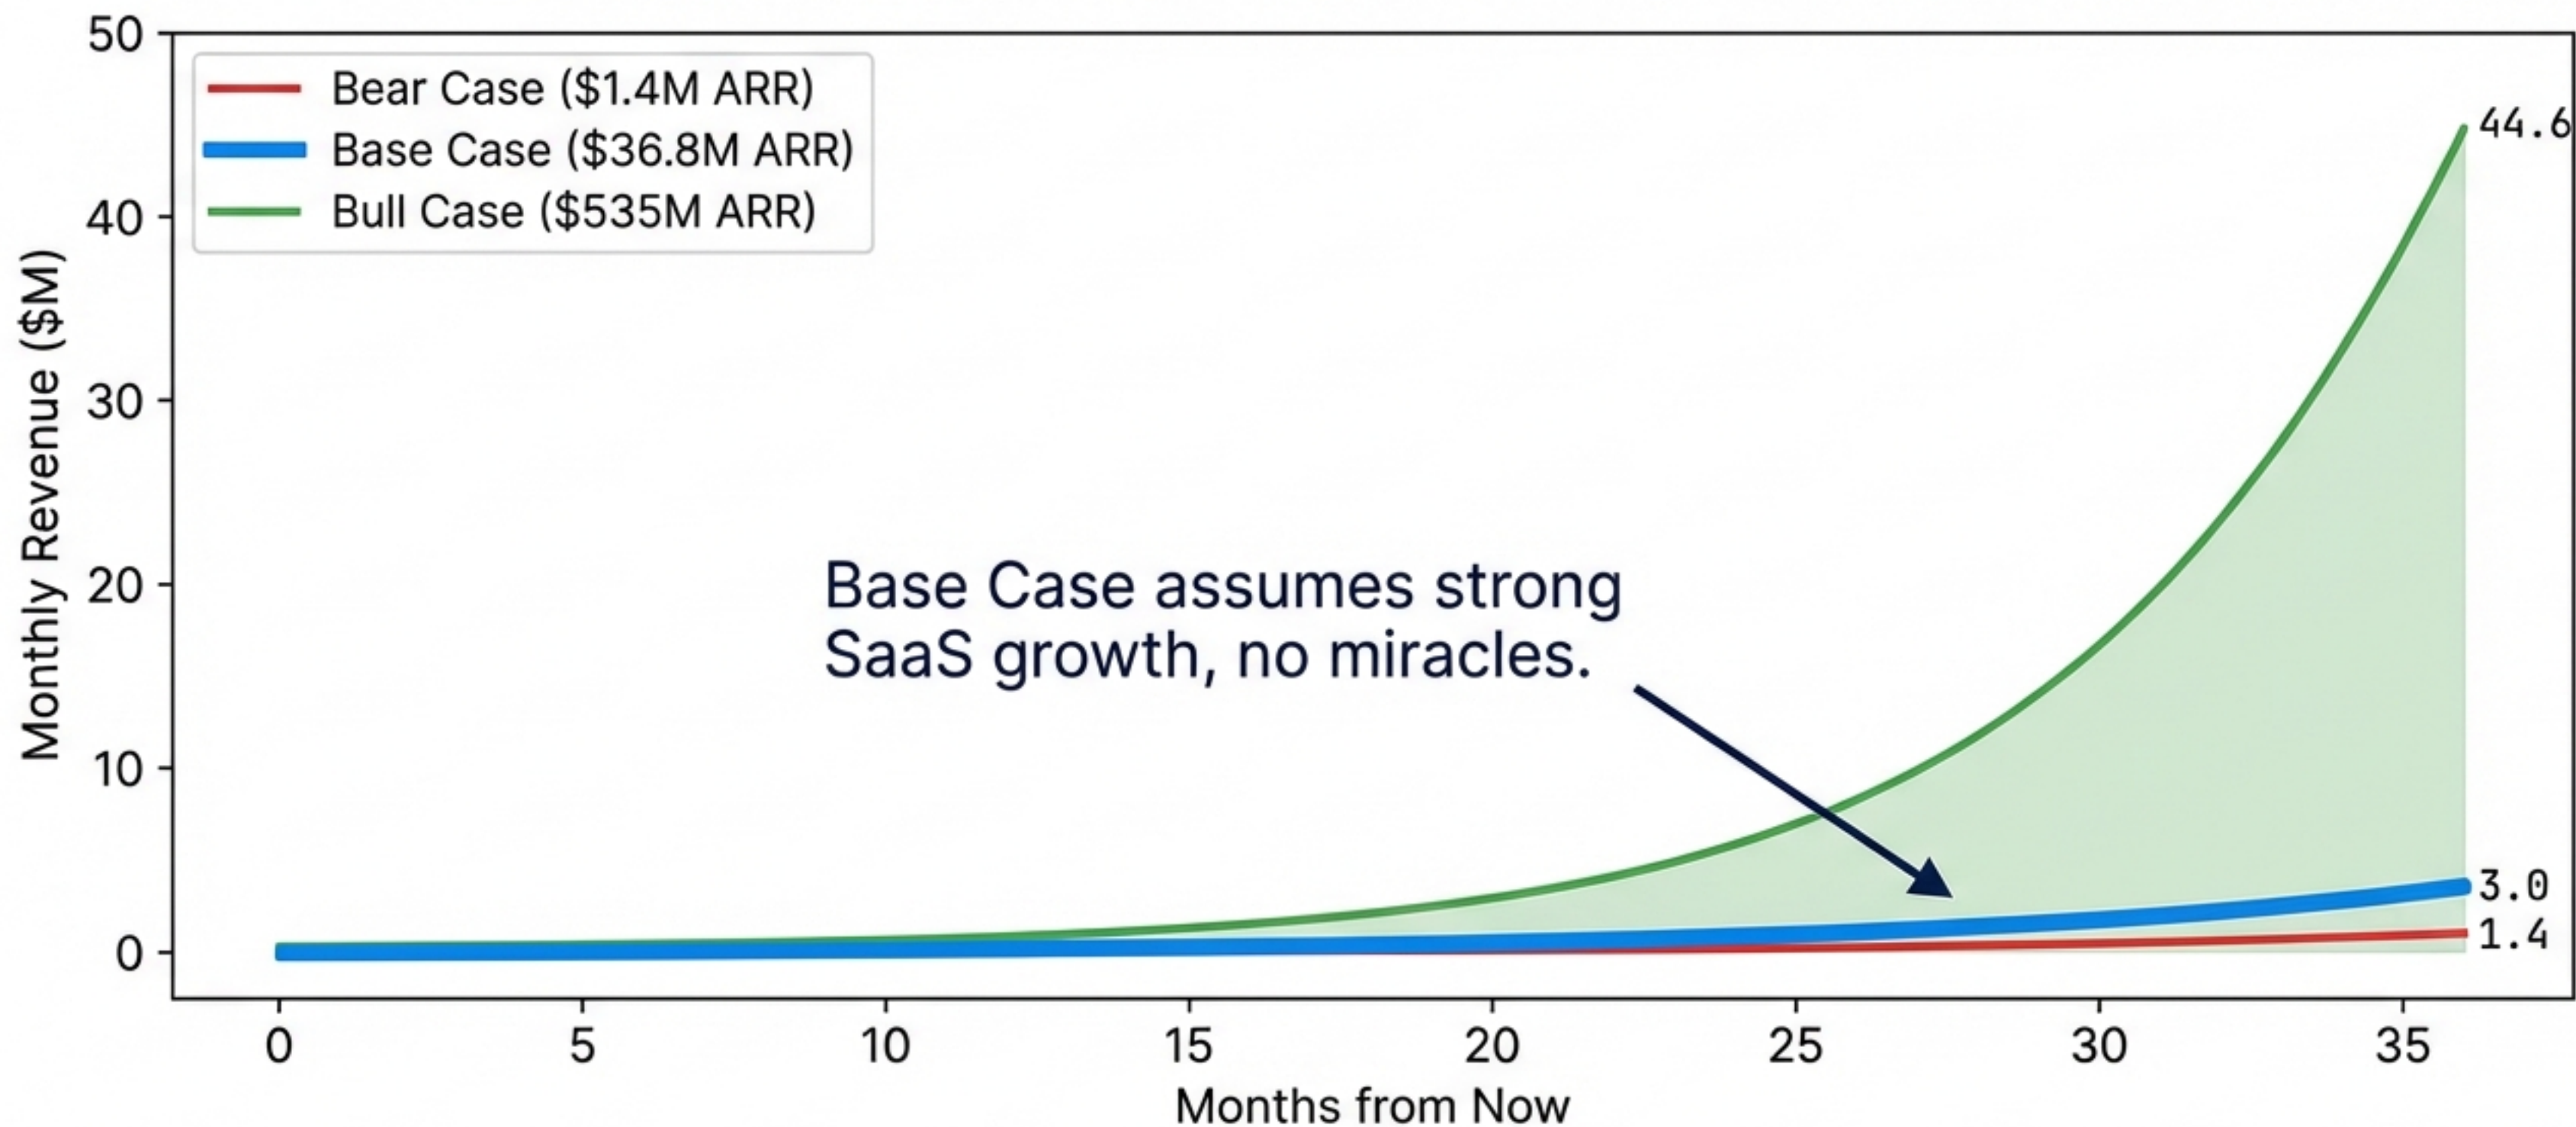

Industry Avg
SaaS Margin:
70-80%

**GuardSpine
Margin: ~90%**

85% Built. Revenue in Weeks, Not Months.

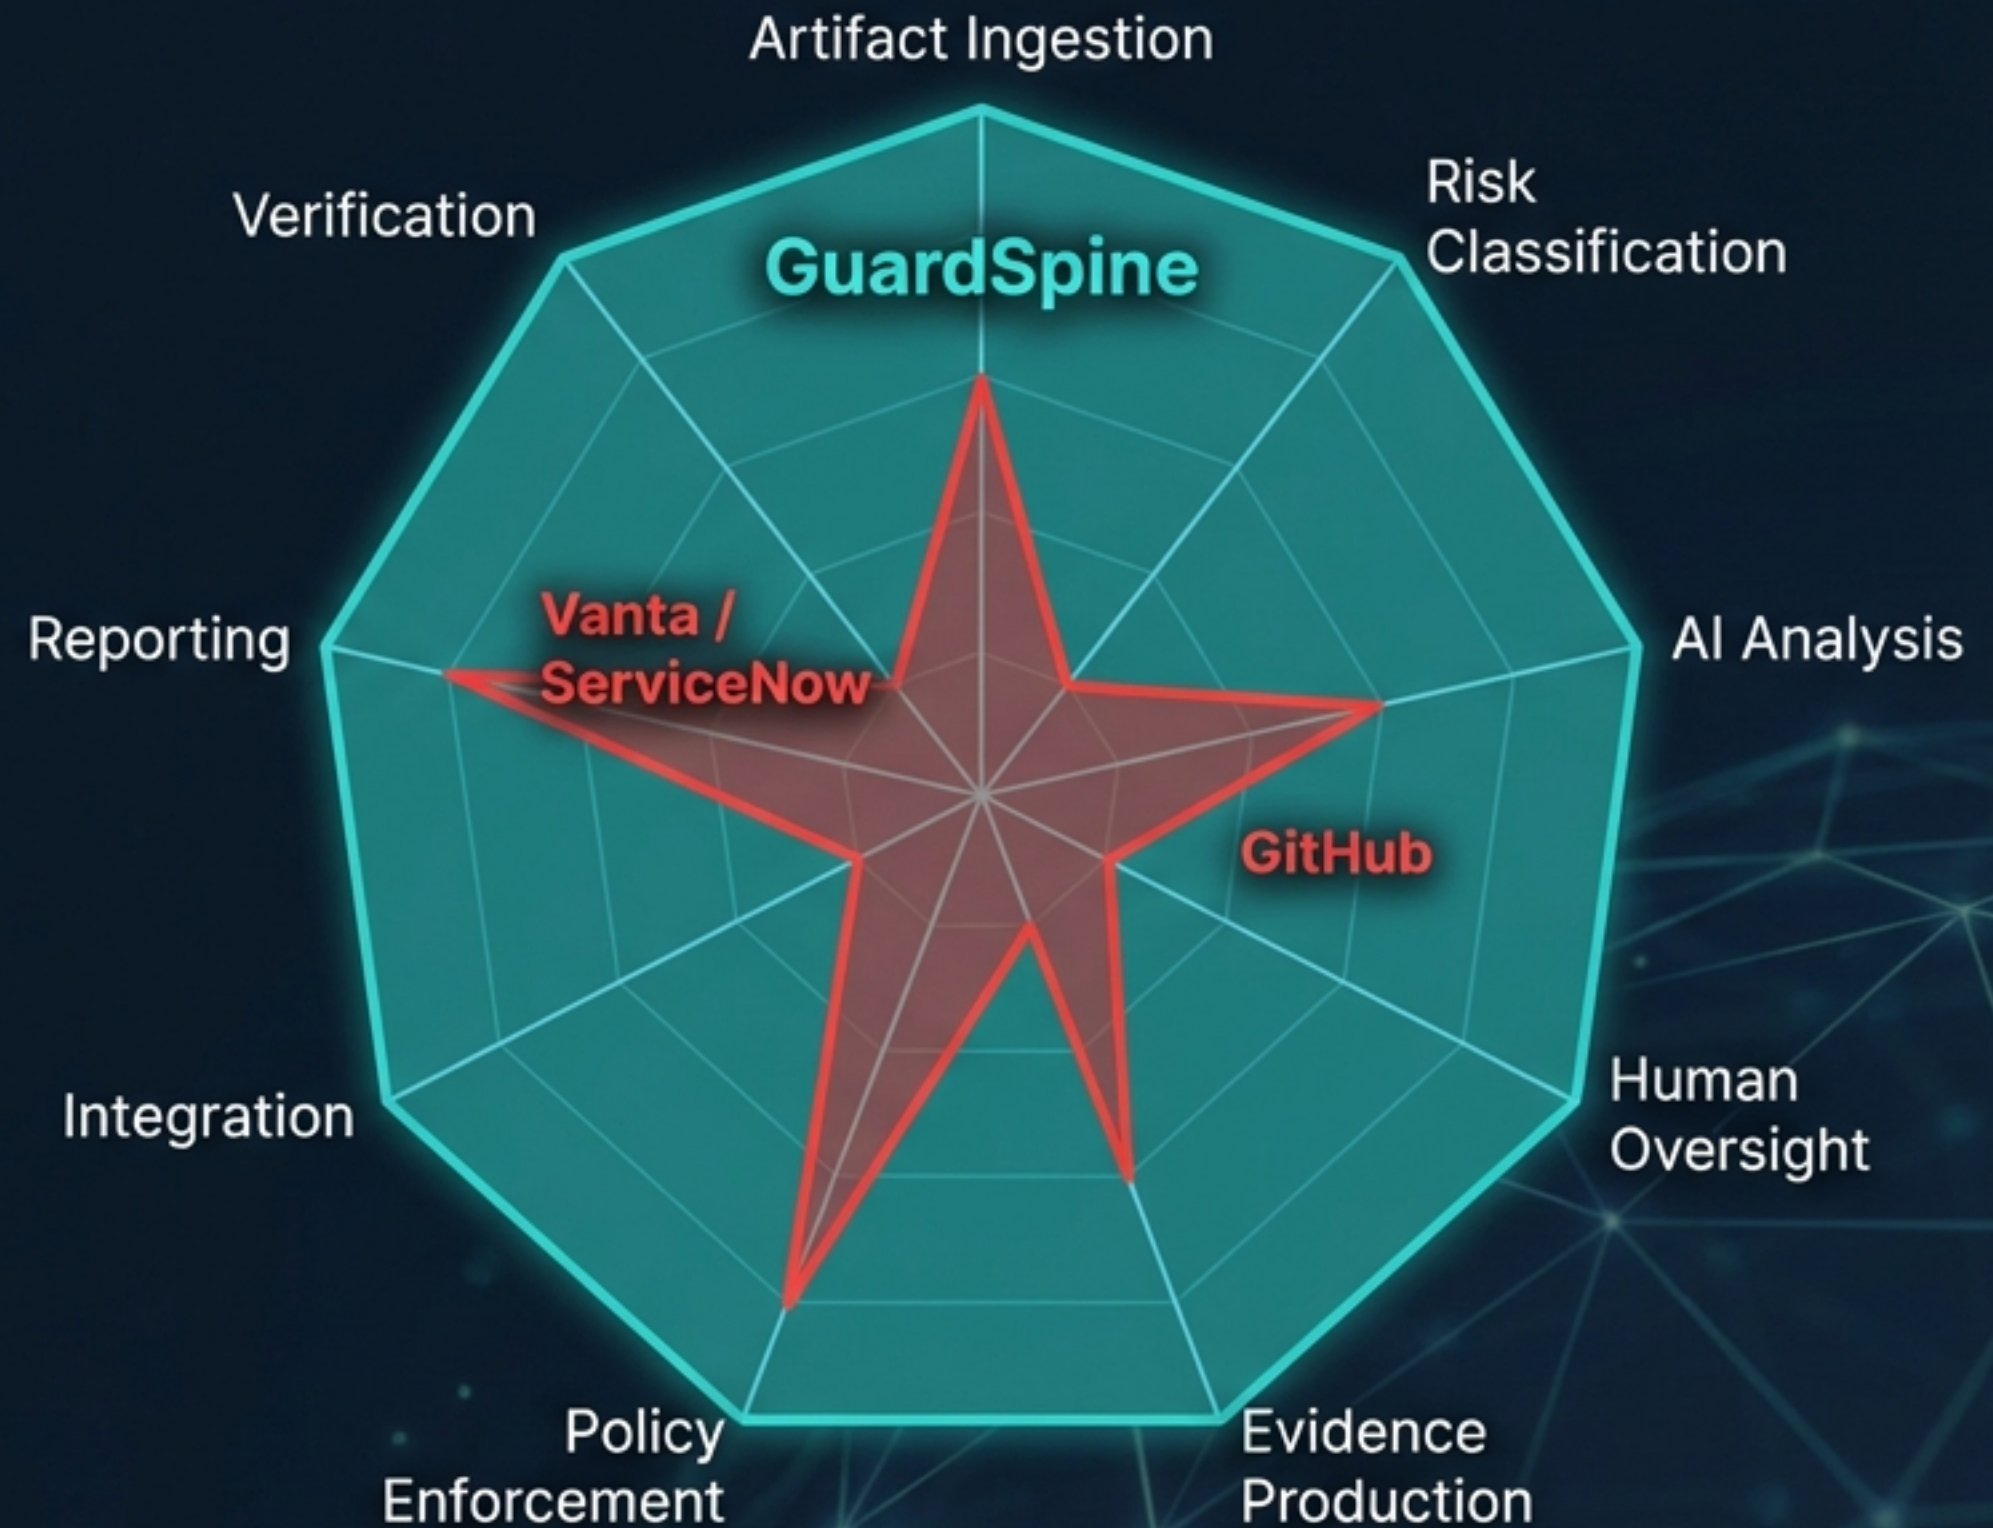

Conservative Path to \$36.8M ARR by Year 3

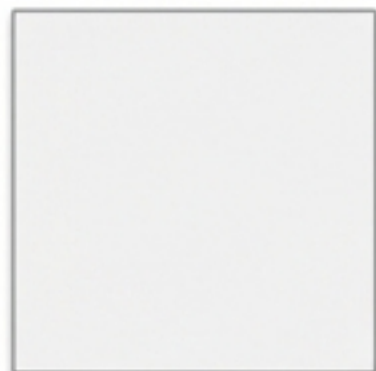

9 of 9 Governance Dimensions. Nearest Rival: 3.

- **GuardSpine** covers the full perimeter.
- Competitors focus on Process Only or Code Only.
- We align with Z-Inspection EU methodology.
- **Model Neutral**: Works with OpenAI, Anthropic, or Local Airgapped models.

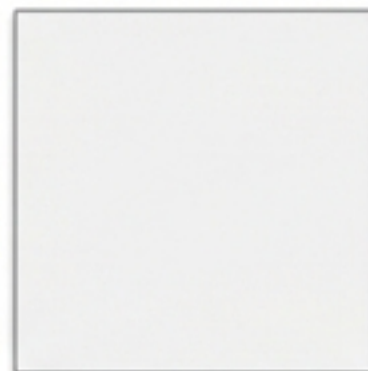

Built by Engineers Who Ship, Not Consultants Who Advise

David Youssef

CEO / Architect

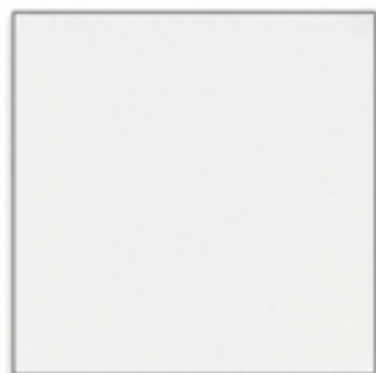

AI systems engineer. Built the 12-repo ecosystem. Full-stack platform architect.

Igor Malovitsa

CTO

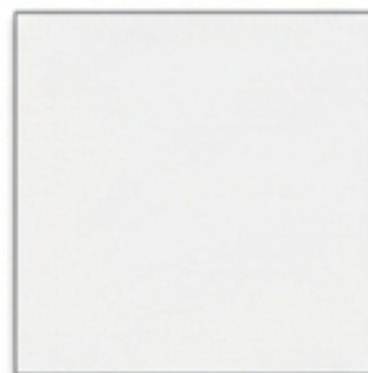

13 years commercial engineering. Rust/Crypto specialist. Physics MSc.

Kristen Hengst Smith

GTM / Product

Angel network & Product-to-market strategy.

Chris Hood

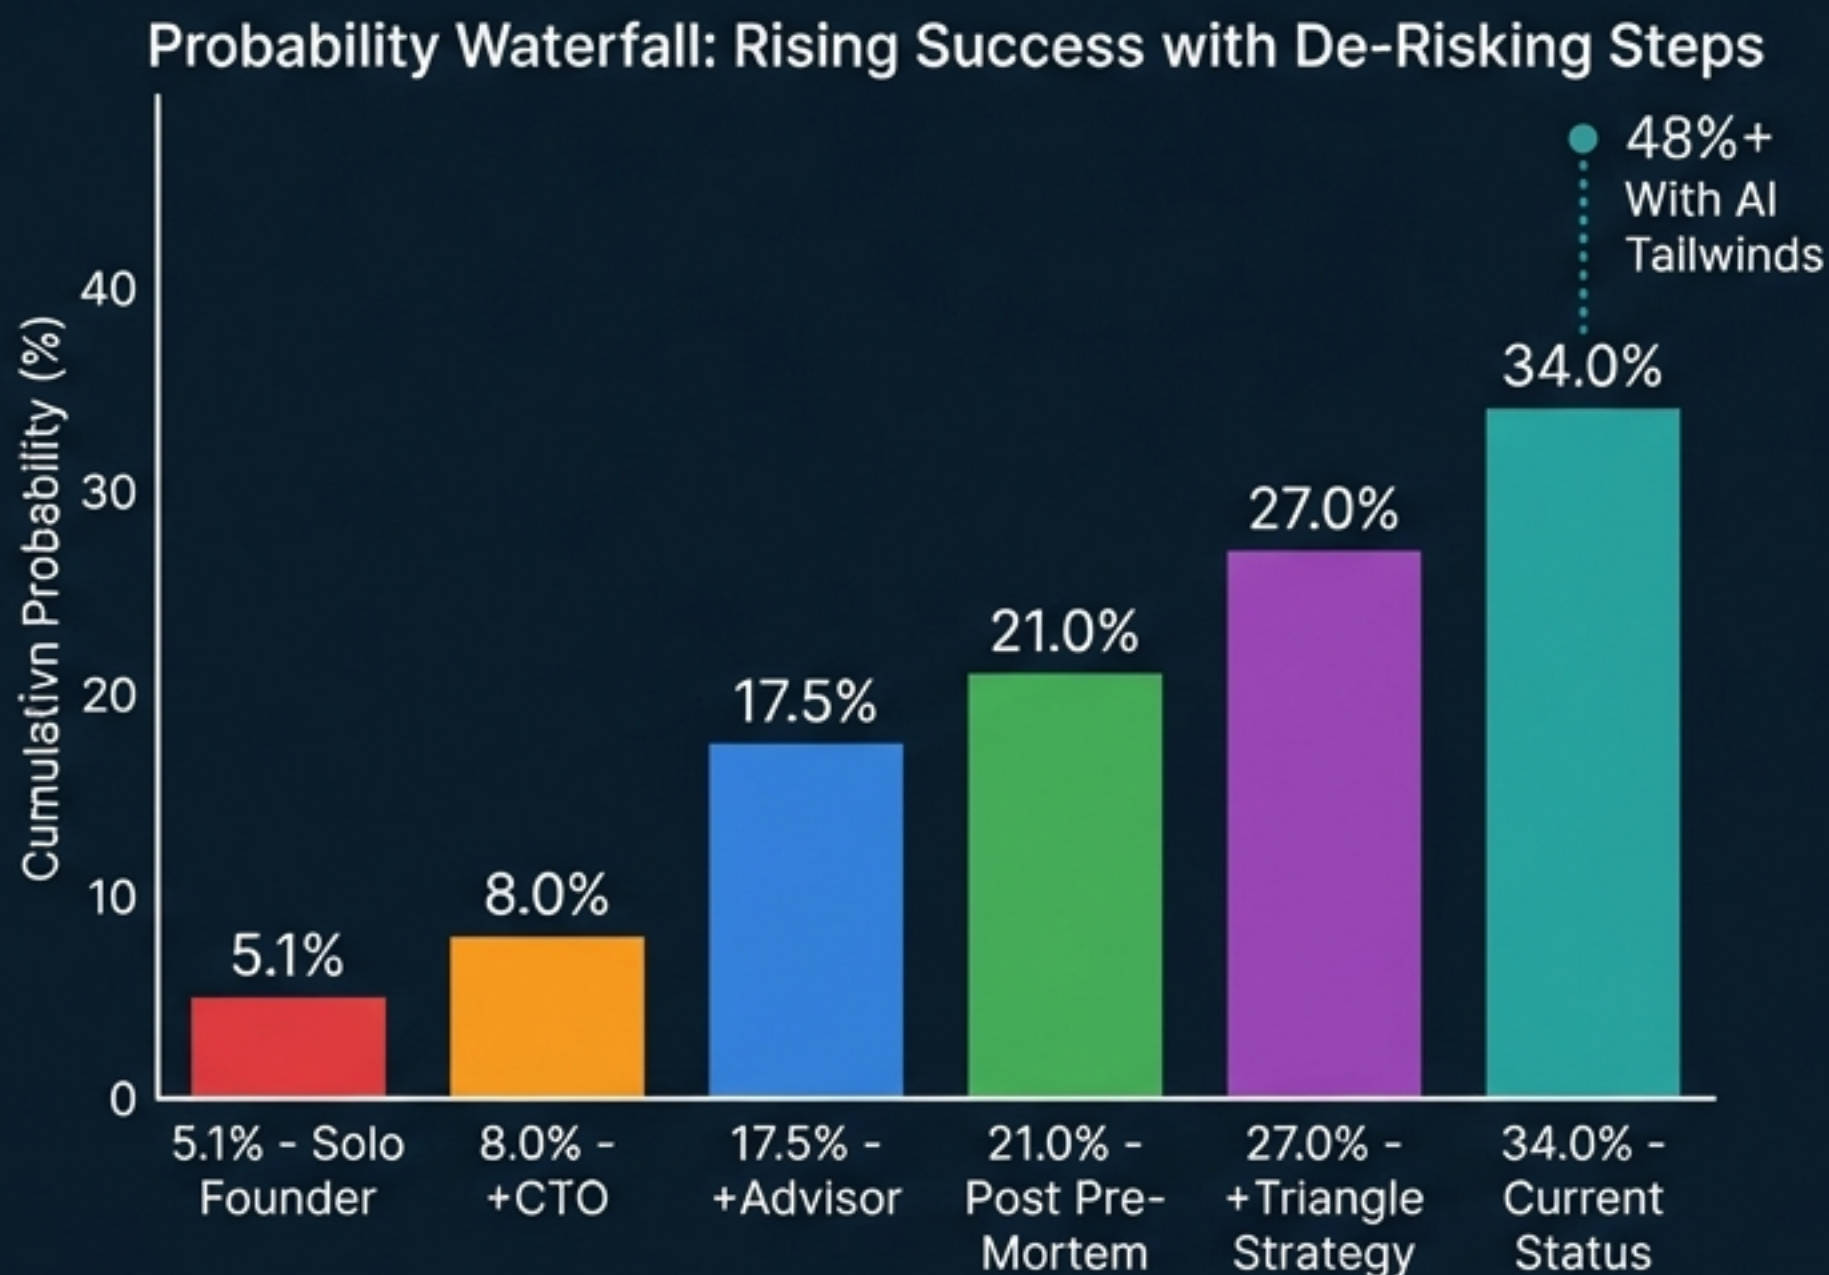

Advisor

Ex-Google, Founder of Noematic AI. Strategic credibility.

Strategic Partners (The Triangle Strategy)

- Ishwar Chandrasekharan (IBM / Z-Inspection) - Enterprise Validation
- Jacob Friedman (G7 AI Governance) - Standards & Gov Access

\$1M Buys 10% of a \$9M Pre-Money Company

Ask / Deal Details

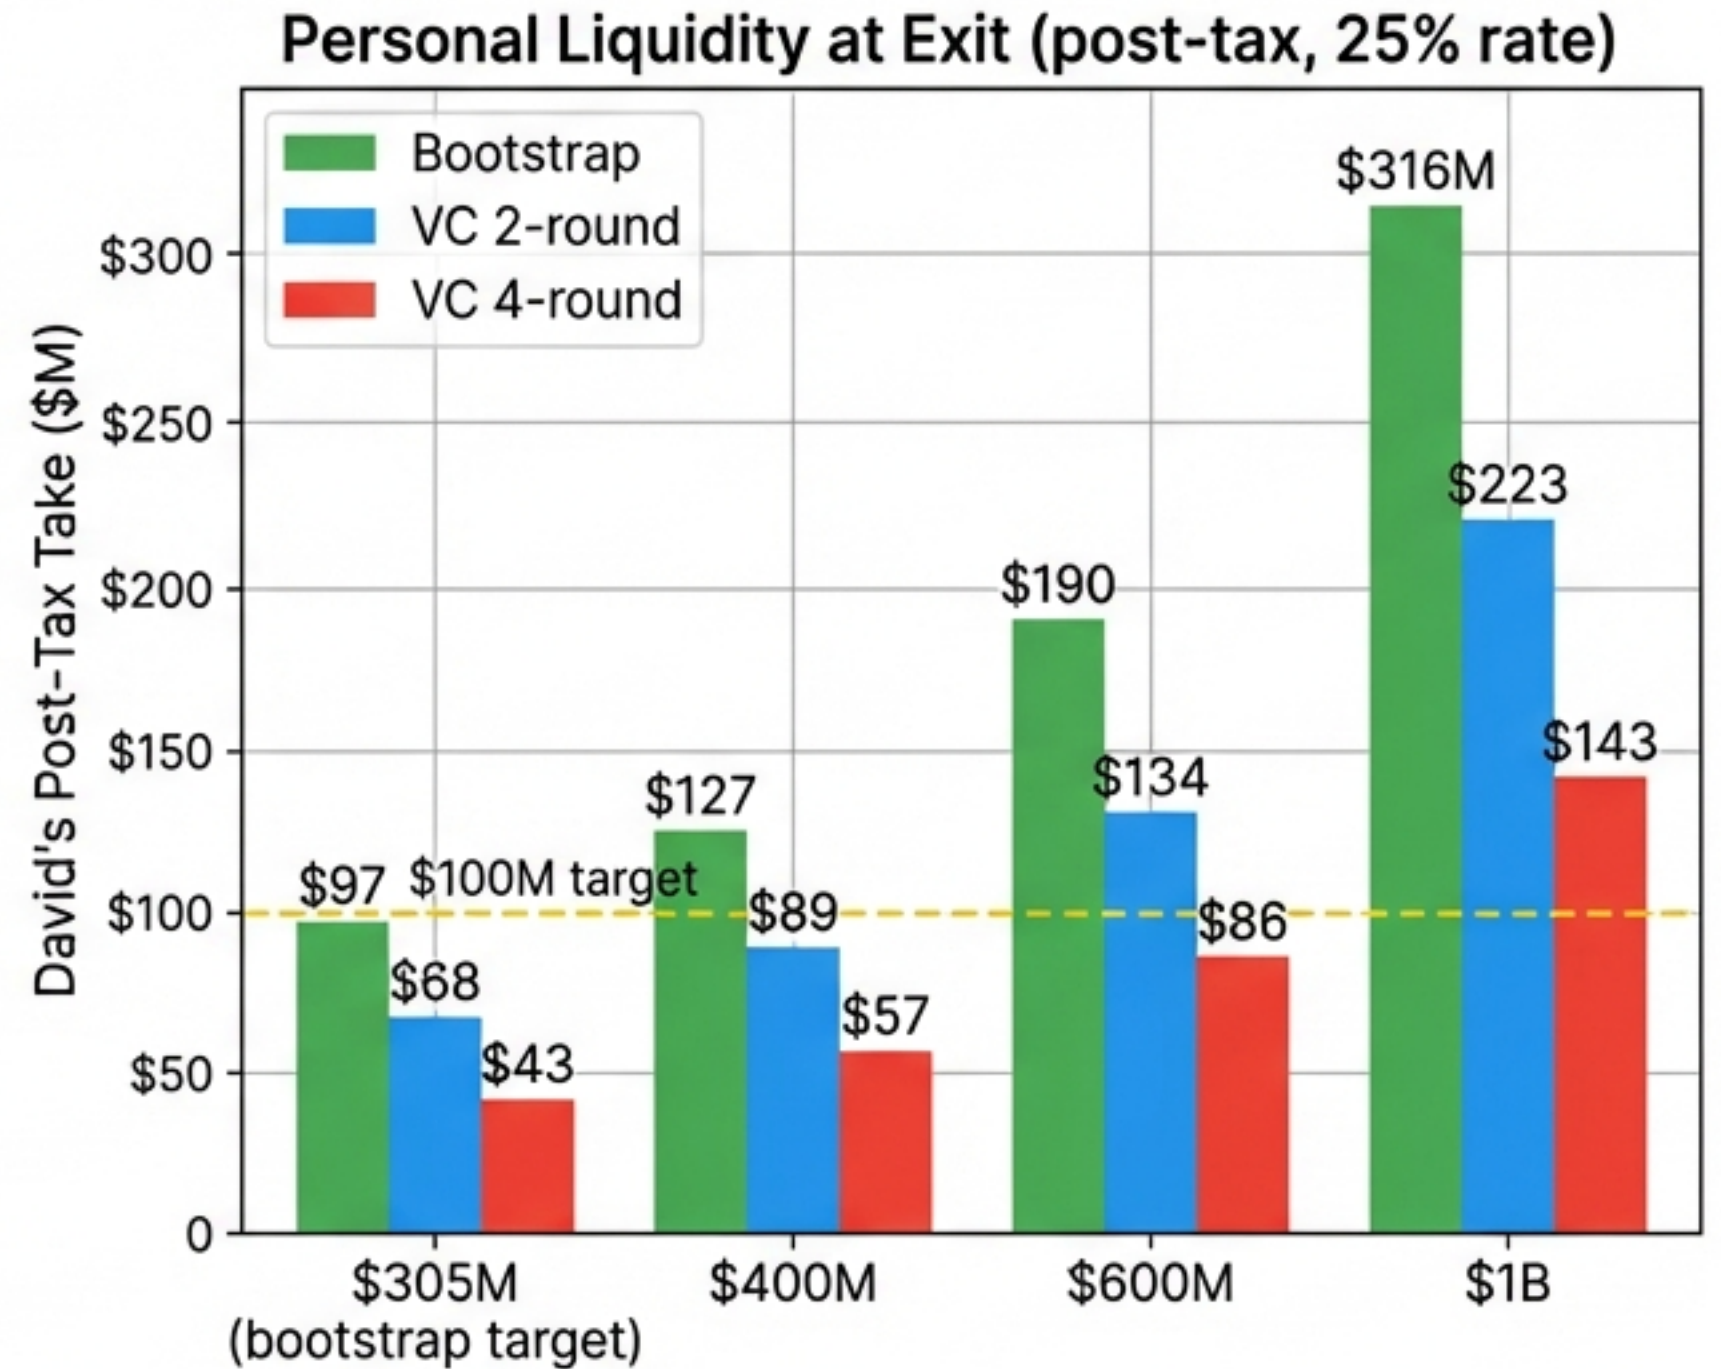

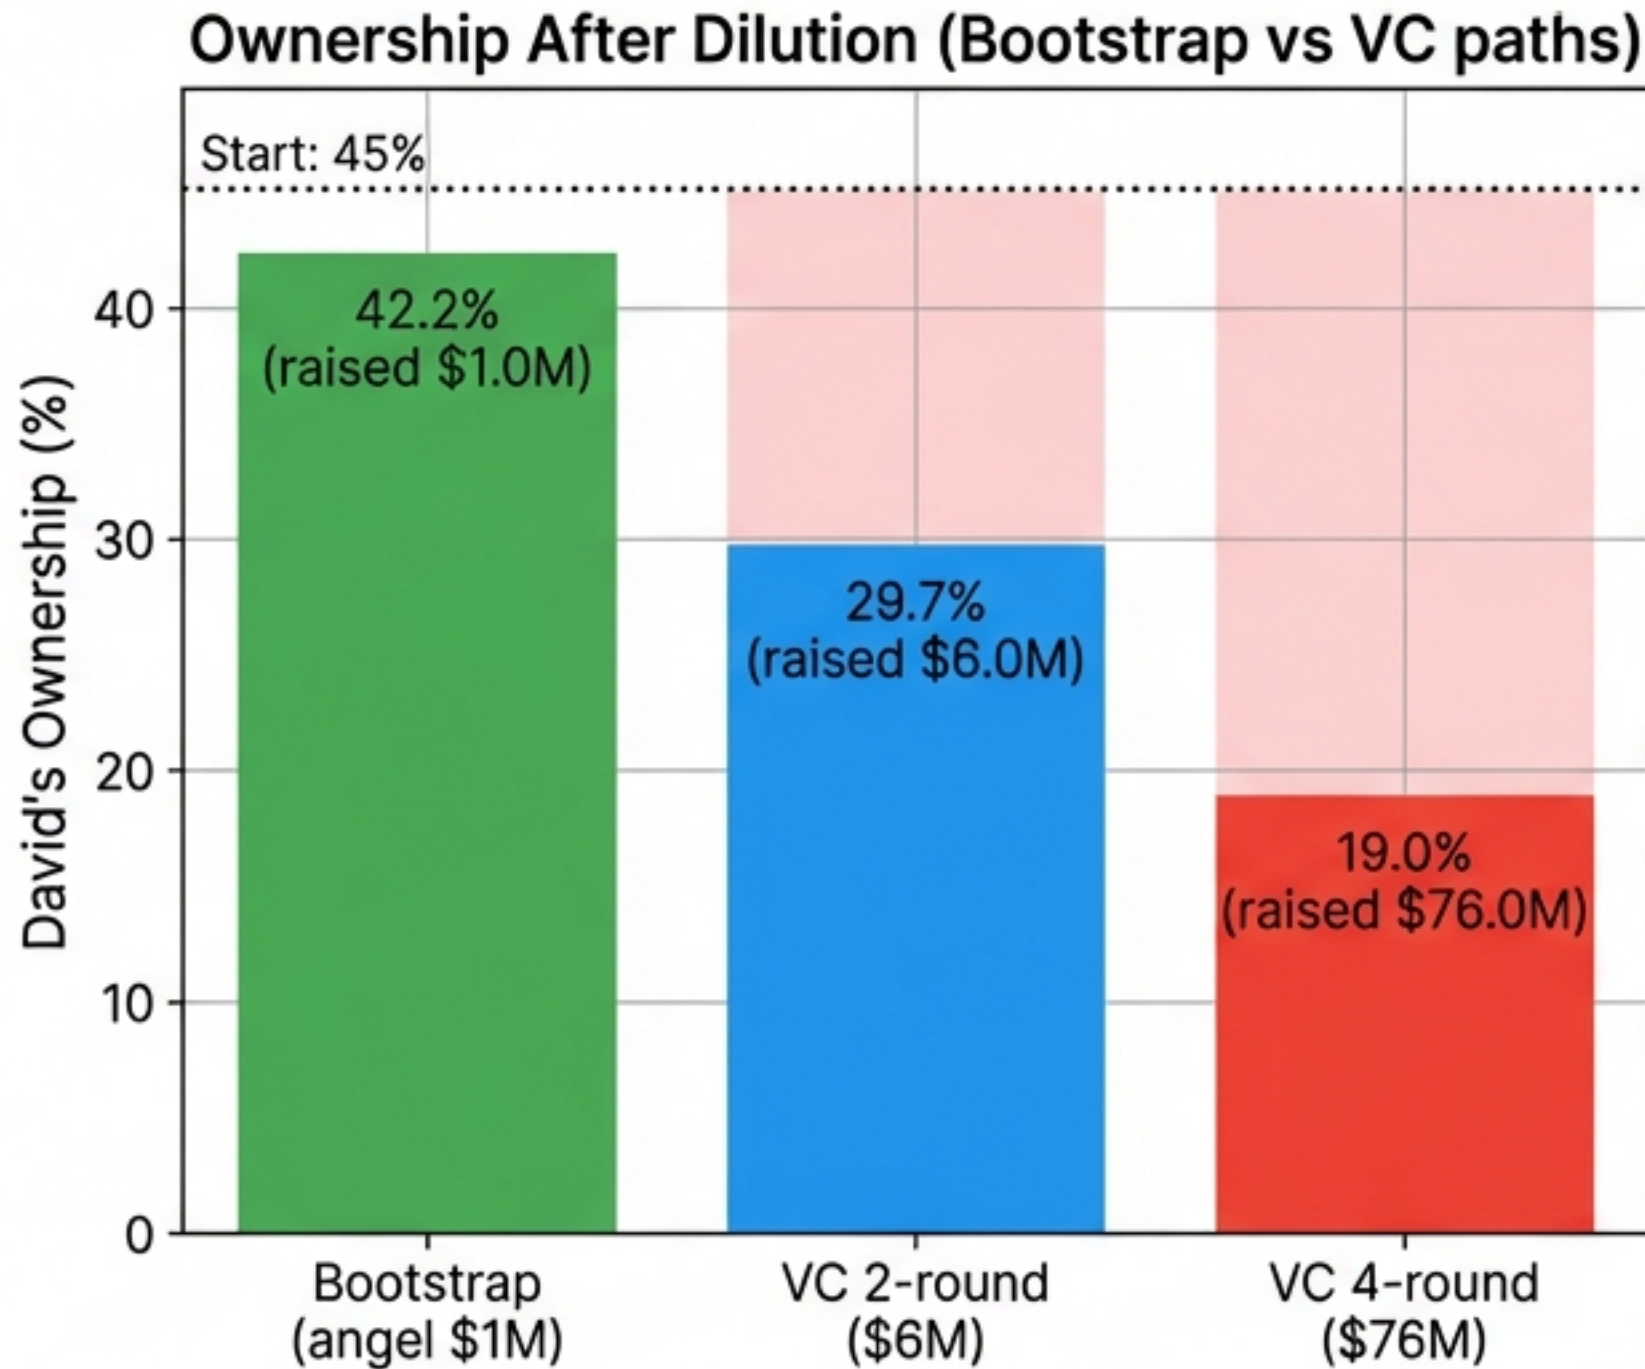

- Ask: \$1M Angel Round
- Valuation: \$9M Pre-money (\$10M Post)
- Runway: 25 months
- Use of Funds: Engineering hire, Legal/SOC2, Infrastructure.

Every AI decision. Governed. Proved. Trusted.

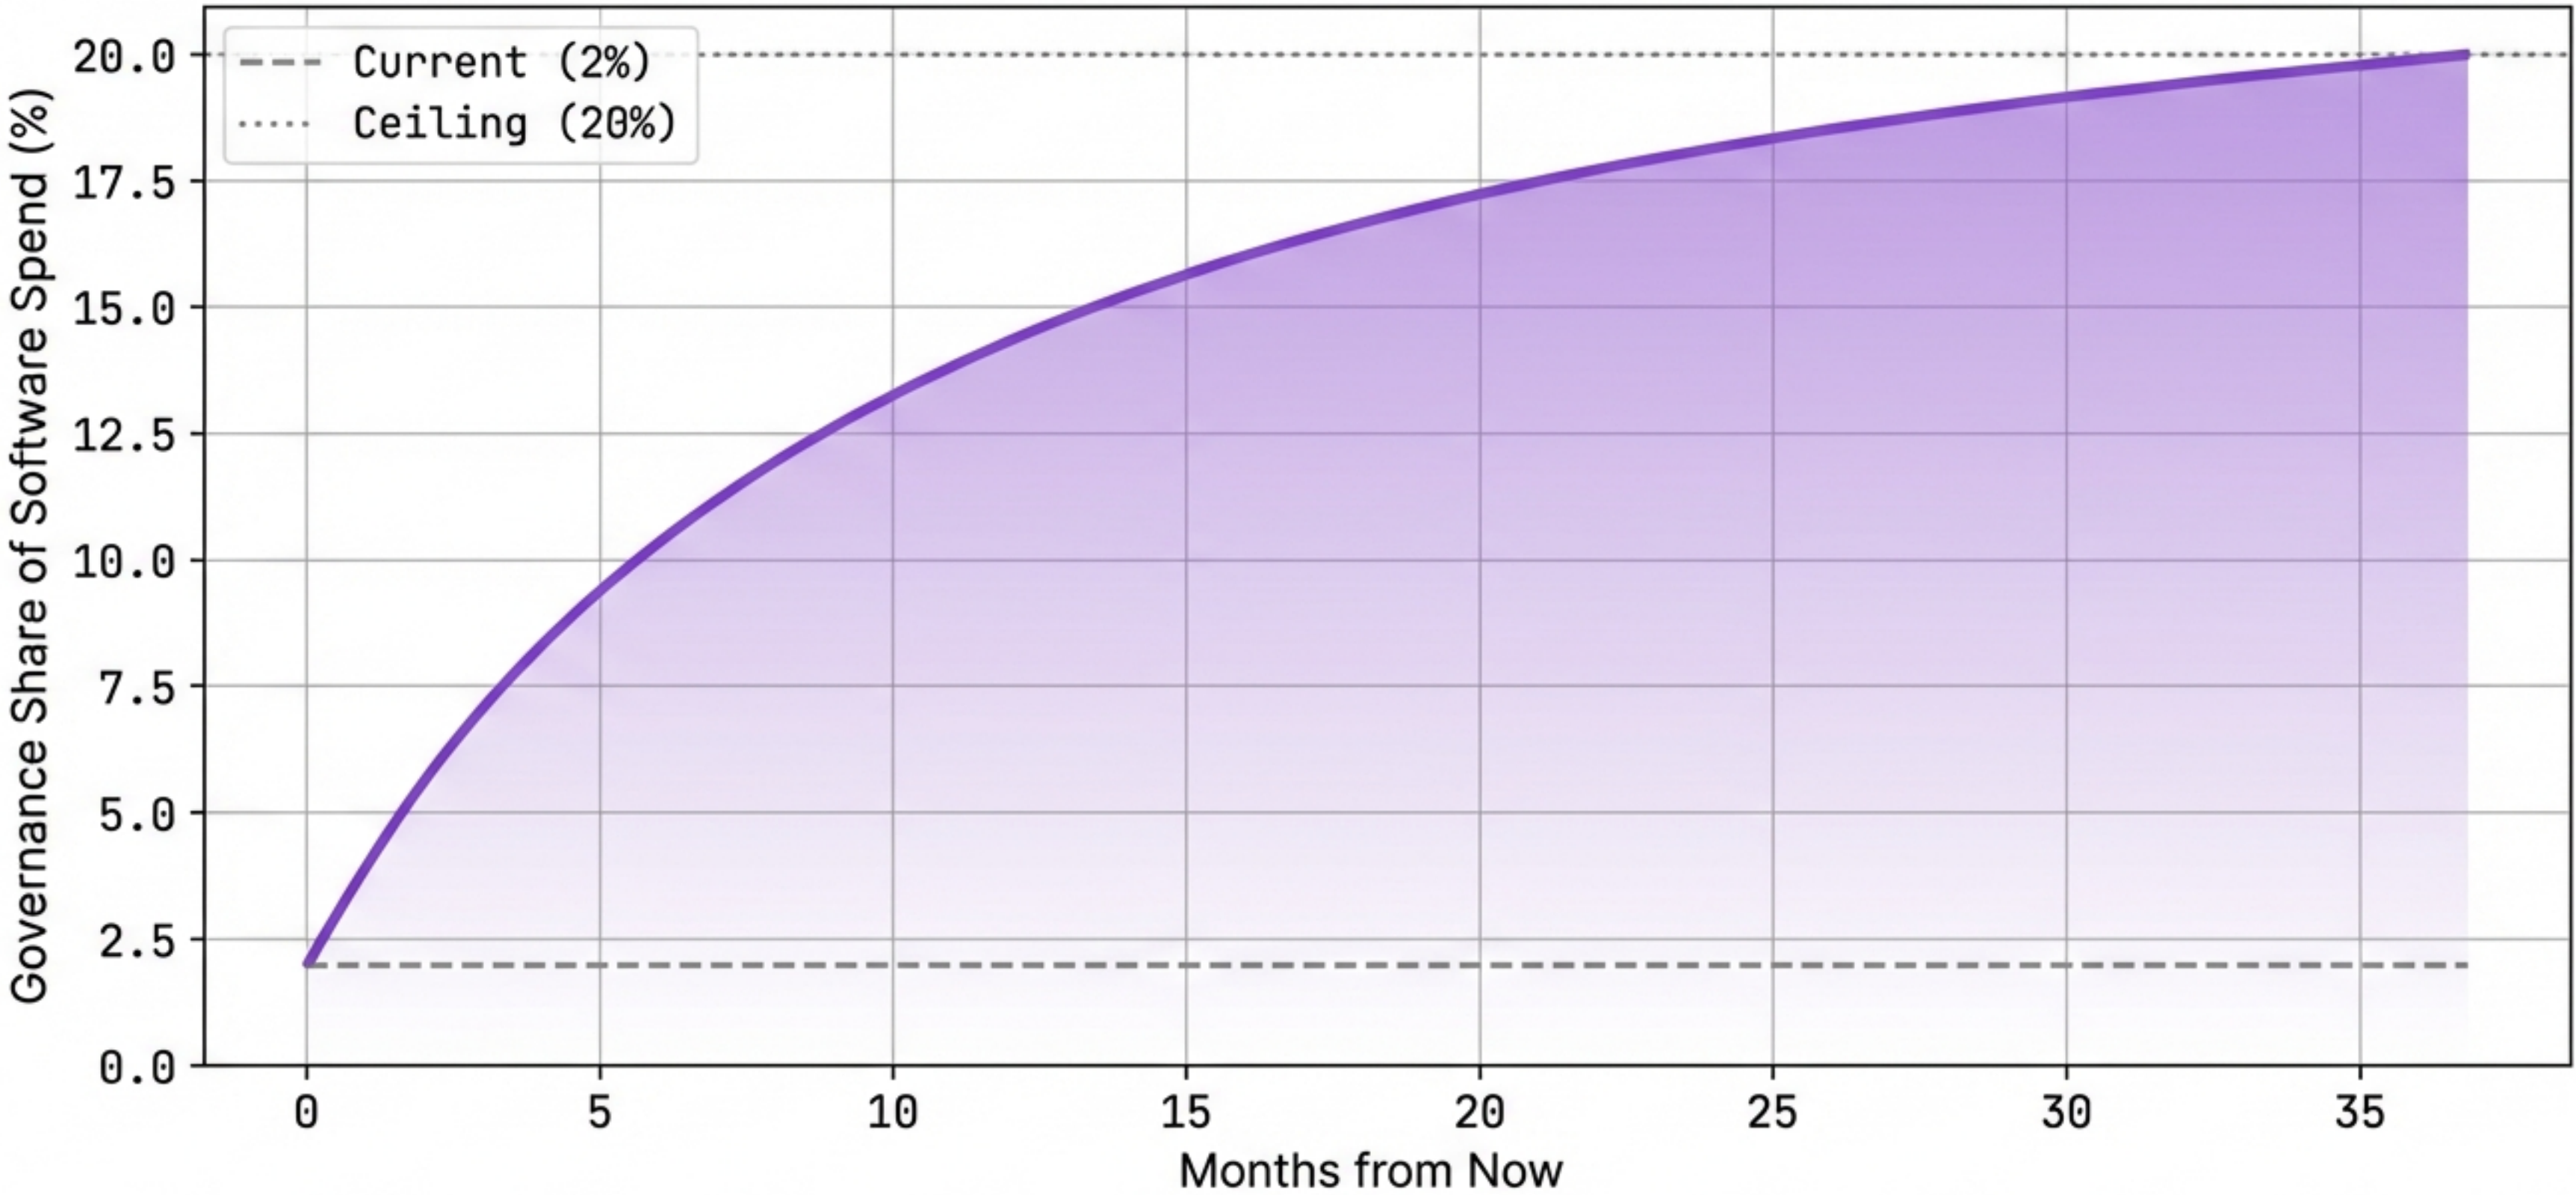

We are building the world where enterprises ship AI with confidence—not because they trust the model, but because they can prove every decision it made.
