

Deep competitive profiles for Vanta, Drata, and CrowdStrike

Comparison table of key metrics

Legend:

- **[est.]** = estimated / not confirmed by the company (or not from audited filings)
- **△** = data point is **>12 months old** as of **Feb 20, 2026 (America/New_York)**

Metric	Vanta	Drata	CrowdStrike
Company type	Private (venture-backed). ¹	Private (venture-backed). ²	Public (NASDAQ: CRWD). ³
Founded	2018. ⁴	2020 (LinkedIn lists "Founded 2020"). ⁵	2011. ⁶
HQ / primary office	San Francisco ⁷ (company press release location). ¹	Historically San Diego ⁸ ; CEO says new HQ in San Francisco (Feb 2026). ⁹	Austin ¹⁰ (principal executive offices). ⁶
ARR (most recent available)	>\$100M ARR (FY '24 statement dated Jan 31, 2024) △. ¹¹	\$100M+ ARR (Feb 19, 2025) △ (just over 12 months). ¹²	\$4.92B ARR as of Oct 31, 2025 (23% YoY). ¹³
ARR trajectory (confirmed + best estimates)	Confirmed: >\$10M ARR by the time investors reviewed the business ahead of Series A (context in 2022 founder post) △; >\$100M ARR in FY '24 △. ¹⁴ Estimates: \$152M (FY2024) → \$220M (July 2025) [est.] . ¹⁵	Confirmed: CEO claims "\$1M → \$100M ARR in 3.5 years" and "\$100M+ ARR" (Feb 19, 2025) △. ¹² Estimates: \$98M ARR (Jan 2025) [est.] (conflicts with company "\$100M+"). ¹⁶	Confirmed: \$3.435B ARR (Jan 31, 2024) △ → \$4.242B ARR (Jan 31, 2025) △ → \$4.92B ARR (Oct 31, 2025). ¹⁷
Revenue growth rate (YoY)	Not publicly disclosed GAAP revenue. Closest disclosed growth proxy: "nearly doubling" customer base in FY '24 △. ¹⁸ ARR growth [est.]: ~45% from \$152M → \$220M (FY2024 to July 2025 estimates). ¹⁵	CEO reports 60% YoY revenue growth (Feb 10, 2026). ¹⁹	Q3 FY2026 revenue \$1.234B (+22% YoY) ; FY2025 revenue \$3.95B (+29% YoY) . ²⁰

Metric	Vanta	Drata	CrowdStrike
Total funding raised	Company says \$504M total (reported with Series D) (note: “since 2021” wording appears in press release). ²¹	Seed \$3.2M + Series A \$25M + Series B \$100M + Series C \$200M = \$328.2M total (sum of announced rounds). ²²	Company statements imply >\$480M total funding raised after Series E (Jun 2018). ²³
Latest valuation / market cap	\$4.15B valuation (Series D, Jul 23, 2025). ²⁴	\$2.0B valuation (Series C, Dec 7, 2022) ²⁵	Market cap: \$104.81B (Yahoo Finance “as of 2/18/2026”) vs \$106.42B (CompaniesMarketCap “Feb 2026”) — discrepancy likely due to timestamp/pricing. ²⁶
Path to profitability	Not publicly disclosed (private). Series B-era message emphasizes discipline on fundamentals (burn, gross margins). ²⁷	Not publicly disclosed (private).	Mixed: FY2025 GAAP net loss \$19.3M ; FY2024 GAAP net income \$89.3M ; company notes it has a history of losses though it achieved profitability in certain periods (including fiscal 2024). ²⁸
Paying customer count (most recent available)	12,000+ companies across 58 countries (Jul 23, 2025). ²¹	8,000+ customers (Feb 10, 2026). ¹⁹	>74,000 organizations as of Jan 31, 2025 (includes end customers and MSSP end customers) ²⁹
Customer count cross-check	Older snapshots: 7,000 (Jan 31, 2024) ³⁰ ; 8,000+ (Jul 24, 2024) ³⁰	Older snapshots: 7,000+ (Feb 19, 2025) ³¹ ; earlier 2,000+ (Dec 2022) ³¹	Alternate metric: subscription customers grew 23,019 (Jan 31, 2023) → 29,000 (Jan 31, 2024) ³² (excludes smaller customers served through MSSP partners per third-party recap).

Metric	Vanta	Drata	CrowdStrike
Notable customers (examples they name publicly)	Atlassian ³³ , Entity["company","Quora","q&a platform"] ³⁴ , ZoomInfo ³⁴ , Omni Hotels ³⁵ . ³⁶	Notion ³⁷ , LinkedIn ³⁸ , Okta ³⁹ , OpenAI ⁴⁰ , Tenable ⁴¹ . ¹²	Named in public reporting: Delta Air Lines ⁴² (litigation tied to the July 2024 outage). ⁴³ \nAlso, CrowdStrike's outage and footprint were described as affecting critical sectors and widely deployed across large enterprises (including "over half of the Fortune 500") — not a logo list, but a scale indicator. ⁴⁴
Employee count (current + 2y trajectory)	1,000+ employees (Jul 23, 2025). ²¹ \nEarlier: 250 employees (Jun 8, 2022) ²⁷	691 employees [est.] (as-of Jan 31, 2026, third-party) and LinkedIn shows "501–1,000 employees" range. ⁴⁵ \nEarlier: >250 employees (Sep 7, 2022) ⁴⁶ ; >70 employees (Nov 8, 2021) ⁴⁶	10,118 full-time employees (Jan 31, 2025) ⁴⁷ ; prior year 7,925 (Jan 31, 2024) ⁴⁷ , and disclosure that headcount grew from 4,965 (Jan 31, 2022) → 7,925 (Jan 31, 2024) ⁴⁷
Geographic presence	58 countries ; "five global offices" (press release). ²¹	Customers in 80+ countries ; leadership mentions offices/teams across multiple regions and a SF HQ move. ⁴⁸	Global footprint: data centers in the United States ⁴⁹ and Europe; R&D centers across multiple regions (including Romania ⁵⁰ , Israel ⁵¹ , India ⁵²). ⁵³
Crunchbase profile URLs	https://www.crunchbase.com/organization/vanta	https://www.crunchbase.com/organization/drata	https://www.crunchbase.com/organization/crowdstrike

Vanta profile

Memory sheet (the numbers investors will probe): Valuation **\$4.15B** (Jul 23, 2025); total funds raised **\$504M**; **12,000+ customers** in **58 countries**; **1,000+ employees**; last confirmed ARR milestone **>\$100M ARR (FY '24)** ⁵⁴

Financial metrics (most recent available)

Vanta's most recently **confirmed** ARR disclosure is that it "crossed **\$100M in ARR**" in **FY '24** (statement dated **Jan 31, 2024**), which is now **>12 months old**.¹⁸ Vanta reiterated the \$100M ARR milestone again in its Series C announcement (Jul 24, 2024).⁴

For forward-looking investor conversations, the best publicly accessible ARR *estimates* diverge from the "\$100M+" framing: Sacra estimates **\$152M ARR (2024)** and **\$220M ARR (July 2025) [est.]**.¹⁵ These are not company-confirmed figures and should be treated as directional only.

On funding, Vanta publicly announced:

- **Series A (May 4, 2021): \$50M** led by Sequoia Capital⁵⁵, reported at a **\$500M valuation** (press coverage).⁵⁶
- **Series B (Jun 8, 2022): \$110M** led by Craft Ventures⁵⁷ at a **\$1.6B valuation**.²⁷
- **Series B extension (Oct 12, 2022): \$40M** (reported as an extension to the Series B).⁵⁸
- **Series C (Jul 24, 2024): \$150M** at a **\$2.45B valuation**, with Sequoia leading.⁵⁹
- **Series D (Jul 23, 2025): \$150M** led by Wellington Management⁶⁰ at a **\$4.15B valuation**.²¹

Vanta reports total funds raised of **\$504M** in connection with the Series D; Reuters also reports total external funding at **\$504M**.²¹ Adding the prominently reported rounds above (and a widely reported early **\$3M seed** after Y Combinator⁶¹) yields **~\$503M**, so you should be ready to note that the **\$504M** total likely reflects a smaller bridge, secondary, or rounding differences.⁶²

Profitability: Vanta does not disclose GAAP profitability; its founder commentary around Series B emphasizes investors scrutinizing burn rate and efficiency, but it does not state profitability.²⁷

Scale metrics

Customer count has been disclosed multiple times with clear upward steps: **3,000+ customers** (Jun 8, 2022) , **7,000** (Jan 31, 2024) , **8,000+** (Jul 24, 2024) , and **12,000+** (Jul 23, 2025).⁶³

For "logos they publicize," Vanta has repeatedly named customers such as Atlassian, Quora, ZoomInfo, and Omni Hotels in its own announcements.³⁶

On headcount, Vanta disclosed **250 employees** (Jun 2022)  and later stated **"1,000+ Vanta'ns"** (Jul 2025).⁶⁴ Reuters independently described Vanta as employing "more than 1,000."⁶⁵

Geographically, Vanta publicly stated **58 countries** and "five global offices" (Jul 2025), and Reuters described offices across the U.S. plus locations in Europe and Australia.²¹

Growth archaeology — what did it take to get there?

Vanta's founder narrative is unusually explicit about a few early milestones: by the time it raised its Series A (raised after YC), it had already reached **"over \$10 million in ARR"** (described retrospectively in the Series B post).²⁷ That implies very strong pre-Series-A efficiency (even though a precise "time to first \$1M ARR" is **not disclosed**).

Funding cadence (founding → rounds) is relatively legible: founded 2018 → Series A in 2021 → Series B in 2022 → Series C in 2024 → Series D in 2025.⁶⁶

Key inflection points that show up directly in company updates:

- The product started as SOC 2 automation for startups and later expanded into “trust management” / GRC workflows (founder framing). ⁶⁷
- FY '24: the company frames a shift to “enterprise-ready features” and broader AI capabilities and explicitly ties that year to crossing **\$100M ARR** and launching/expanding AI and vendor risk features. ¹⁸
- 2024–2025: the company positions expansion into third-party risk and government compliance as strategic growth vectors. ⁶⁸
- Vanta’s pricing page also banners an acquisition of **Riskey** in the vendor-risk area. ⁶⁹

Product positioning

Vanta positions itself as an “agentic trust platform” with tiered plans (Essentials / Plus / Professional / Enterprise) and product modules such as Questionnaire Automation, access reviews/requests, risk management, and Trust Center functionality. ⁶⁹

Target customer: Vanta explicitly states it “began...helping startups automate SOC 2,” and later describes usage “from seed-stage to the Fortune 50.” ⁷⁰ That’s a clear **startup-to-enterprise** span, with messaging increasingly oriented toward enterprise GRC and risk programs. ⁷¹

Pricing model: Vanta does not publish list prices and pushes users to request personalized pricing. ⁶⁹ Third-party procurement commentary suggests “starting around \$10,000/year” with higher tiers often **\$30k–\$80k [est.]**; treat as directional, not a quote sheet. ⁷²

Compliance frameworks supported (representative list shown on Vanta pages): SOC 2, ISO 27001, GDPR, HIPAA, HITRUST, CMMC, FedRAMP, and others. ⁷³

Drata profile

Memory sheet: Last disclosed ARR milestone **\$100M+ ARR** (Feb 19, 2025) [△]; **8,000+ customers** in **80+ countries** (Feb 10, 2026); last disclosed valuation **\$2B (Dec 2022)** [△]; cumulative announced funding **\$328.2M**. ⁷⁴

Financial metrics (most recent available)

ARR disclosures are **strong but imperfectly consistent** across sources. Drata’s CEO states Drata is at **\$100M+ ARR** (Feb 19, 2025) and also frames the journey as “**\$1M to \$100M ARR in 3.5 years.**” ¹² A third-party industry model (Sacra) estimates **\$98M ARR (Jan 2025) [est.]**, which conflicts slightly with Drata’s “\$100M+” claim. ¹⁶ For investor conversations, treat the **company claim** as “headline,” and keep the **\$98M** estimate ready as a “model-based check” with the right caveats.

Revenue growth: Drata’s founder states **60% YoY revenue growth** (Feb 10, 2026) and **190% YoY enterprise growth**. ¹⁹ These are company-reported and not audited filings, but they are current and attributable.

Funding is unusually transparent (company + PR wires):

- Seed (Jan 13, 2021): **\$3.2M** led by Cowboy Ventures ⁷⁵ . ⁷⁶
- Series A (Jun 23, 2021): **\$25M** led by GGV Capital ⁷⁷ . ⁷⁸
- Series B (Nov 8, 2021): **\$100M** led by ICONIQ Growth ⁷⁹ ; “fastest...to reach \$1B valuation.” ⁸⁰
- Series C (Dec 7, 2022): **\$200M** co-led by ICONIQ Growth and GGV; valuation **\$2B** [△]. ²⁵

Path to profitability: Drata does not publish profitability status (private).

Scale metrics

Customer count has moved through clear plateaus: **2,000+ customers** (Dec 2022) ⁸¹, **7,000+ customers in 60 countries** (Feb 19, 2025) ⁸¹, and **8,000+ customers in 80+ countries** (Feb 10, 2026). ⁸¹

Named customer logos (as Drata itself lists them) include Notion, LinkedIn, Okta, OpenAI, Tenable, and others. ¹²

Drata's headcount is not consistently disclosed in official posts, but you can triangulate a credible trajectory: "more than **70 employees**" (Nov 2021) ⁸², "more than **250 employees**" (Sep 2022) ⁸², and a third-party tracker reporting **691 employees as of Jan 31, 2026 [est.]** (also consistent with LinkedIn "501–1,000 employees" range). ⁸²

Geographically, Drata explicitly describes a global customer base and multiple regions, and it also signals a major HQ footprint decision (new San Francisco HQ) in early 2026. ⁴⁸

Growth archaeology — what did it take to get there?

Drata's posts give unusually concrete early-growth breadcrumbs: in its Series C announcement, the founder says it was founded "during the pandemic" and that in "less than 100 days" Drata had "100 customers automating SOC 2 compliance." ⁸³

Funding velocity is fast and can be recited cleanly in investor meetings: seed in Jan 2021 → Series A in Jun 2021 → Series B in Nov 2021 → Series C in Dec 2022. ²²

Key inflection points (explicitly stated): by Dec 2022 Drata claims expansion to **14+ frameworks** and launches of a **Trust Center** and a **Risk Management** offering, and deeper integrations. ²⁵ By Feb 2026, Drata highlights the acquisition of **SafeBase** as a strategic shift toward a broader "trust management" platform. ⁴⁸

Product positioning

Drata explicitly frames its platform as a "Trust Management" suite with (at least) four product pillars: **Compliance Automation**, **Security Assurance** (trust center), **Vendor Risk Management**, and **Modern GRC** workflows. ¹²

The plans page shows packaging aimed at scaling from smaller orgs upward: Foundation (up to 50 FTE and one pre-mapped framework), Advanced, and Enterprise, plus separate SafeBase Trust Center + AI Questionnaire Assistance packaging. ⁸⁴

Pricing model: Drata provides plan structures, but not list prices on its own page. ⁸⁴

Framework coverage (representative list on Drata pages): SOC 2, ISO 27001, HIPAA, GDPR, NIST AI Risk Management, FedRAMP, NIS 2, HITRUST, plus custom frameworks. ⁸⁵

CrowdStrike profile

Memory sheet: ARR **\$4.92B** (Oct 31, 2025) with **23% YoY ARR growth**; Q3 FY2026 revenue **\$1.234B (+22% YoY)**; FY2025 revenue **\$3.95B (+29% YoY)**; market cap roughly **\$105B** (mid-Feb 2026); headcount **10,118** (Jan 31, 2025) ⁸⁶

Financial metrics (most recent available)

CrowdStrike reports ARR quarterly/annually using an internal definition; its Q3 FY2026 earnings release reports **ARR of \$4.92B** as of **Oct 31, 2025** (+23% YoY) with **\$265.3M net new ARR** in the quarter. ¹³

ARR is also shown in its FY2025 10-K as a table: **\$4.241838B as of Jan 31, 2025** vs **\$3.435150B as of Jan 31, 2024**, with YoY growth of **23%** and **34%** respectively (note these are now **>12 months old**). ⁸⁷

Revenue growth is reported under GAAP revenue: Q3 FY2026 total revenue **\$1.234244B**, up from **\$1.010178B** in Q3 FY2025 (+22% YoY). ⁸⁸ FY2025 total revenue was **\$3.95B**, up from **\$3.06B** in FY2024 (+29% YoY). ⁸⁹

Market cap is time-sensitive. Yahoo Finance's key statistics page shows **\$104.81B market cap** "as of 2/18/2026," while CompaniesMarketCap shows **\$106.42B** "as of February 2026" (differences are consistent with daily moves). ²⁶ The finance feed shows a share price of **\$422.14** at the latest trade time (Feb 20, 2026 UTC).

Profitability: CrowdStrike's own risk disclosures note a "history of losses," while also stating it achieved profitability in certain periods including fiscal 2024. ⁶ FY2025 was a GAAP net loss year (**-\$19.3M**) while FY2024 had GAAP net income (**\$89.3M**). ⁸⁹ In Q3 FY2026, GAAP operating loss and GAAP net loss persisted, while non-GAAP operating income was positive and free cash flow was significant. ⁹⁰

Scale metrics

Customer count reporting changed over time, so you should keep two parallel "customer" numbers straight:

- **"Trusted by more than 74,000 organizations"** as of Jan 31, 2025 ([△]), explicitly including end customers and MSSP end customers. ⁹¹

- A tighter "subscription customer" metric appears in the FY2024 10-K: subscription customers grew **23,019 (Jan 31, 2023) → 29,000 (Jan 31, 2024)** ([△]). ⁹²

CrowdStrike repeats the **74,000+ organizations** claim in marketing/blog contexts (June 25, 2025), providing a second source for cross-checking that figure. ⁹³

Notable enterprise customers: CrowdStrike does not provide a single "logo wall" in its SEC filings, but public reporting around the July 2024 incident describes its footprint as deep in large enterprises, including mention that it is used by "over half of the Fortune 500." ⁴⁴

Employee count is audited-disclosure-grade: **7,925 full-time employees** (Jan 31, 2024) and **10,118** (Jan 31, 2025) — both now **>12 months old**. ⁹⁴

Geographically, CrowdStrike discloses global operations including U.S. and European data centers, and R&D centers across several U.S. cities plus Romania, Israel, and India. ⁵³

Growth archaeology — what did it take to get there?

Founding (2011) and early funding is unusually well-documented through company press releases and founder posts:

- Series A **\$26M** (Feb 2012) led by Warburg Pincus ⁹⁵ . ⁹⁶
- Series B **\$30M** (Sep 2013) led by Accel ⁹⁷ . ⁹⁸
- Series C **\$100M** (Jul 2015) led by CapitalG ⁹⁹ (then “Google Capital”), and company said total funding raised became **\$156M**. ¹⁰⁰
- Series D **\$100M** (May 2017) led by Accel. ¹⁰¹
- Series E **\$200M+** (Jun 2018) led by General Atlantic ¹⁰² , Accel, and IVP ¹⁰³ ; company described valuation > **\$3B** and (in its blog) total funding > **\$480M**. ¹⁰⁴

That funding cadence (2012–2018) culminated in the IPO (2019); Warburg Pincus describes itself as first investor (Nov 2011) and notes it remained the largest investor at the IPO with a 24% ownership position at that time. ¹⁰⁵

Product positioning

CrowdStrike sells a cloud-native, single-agent cybersecurity platform (“Falcon”) with multiple modules spanning endpoints, cloud workloads, identity, and data, and derives most revenue from subscription contracts generally one to three years. ¹⁰⁶

Pricing model: quote-based SaaS subscriptions are implied by the subscription contract framing in filings, rather than publicly posted price tiers. ¹⁰⁷

Compliance frameworks “supported” is best interpreted here as **product certifications/authorizations** and security compliance posture rather than “audit automation.” CrowdStrike’s FY2025 release highlights multiple FedRAMP authorizations and also notes German C5 certification. ⁸⁹

Competitive dynamics and whitespace

Vanta and Drata compete as **trust/compliance automation platforms**, converging toward broader “trust management” (controls monitoring + evidence + trust center + vendor risk + AI-assisted workflows). Drata’s CEO explicitly lists a four-product trust-management suite (Compliance Automation, Security Assurance, Vendor Risk, Modern GRC). ¹² Vanta’s pricing outlines a comparable shape: compliance framework automation, Trust Center, questionnaire automation, access management, and risk management, increasingly wrapped in an AI “agentic” layer. ¹⁰⁸

Where they appear to differentiate (based on their own positioning):

Vanta’s recent messaging emphasizes an “AI-driven trust” layer and expansion into third-party risk and government compliance. ⁶⁸ Drata’s messaging emphasizes “continuous trust” plus the SafeBase acquisition and an explicit split between the Drata platform (GRC) and SafeBase Trust Center + AI Questionnaire Assistance. ¹⁰⁹

CrowdStrike is structurally different: it is an **endpoint/XDR cybersecurity platform** with many adjacent modules (cloud security, identity, SIEM), but it is not positioned as a SOC 2 / ISO audit automation system. Its filings describe subscription sales of platform modules and professional incident response services, not audit evidence orchestration. ¹¹⁰ The strategic implication is that CrowdStrike typically becomes a **system-of-record for security telemetry**, while Vanta/Drata try to become a **system-of-record for compliance evidence and trust signaling**.

Whitespace: what none of them serve especially well (inference, grounded in their disclosed surfaces)

A recurring “gap” is **tight coupling between security controls (endpoint/security tooling) and audit-ready compliance workflows**. CrowdStrike may provide evidence signals (telemetry, alerts), but the audit workflow is not its core product surface as described in filings. ¹⁰⁶ Vanta/Drata orchestrate audit readiness but rely on integrations into security tooling rather than being the security tool itself. ¹¹¹

This leaves opportunity for products (or bundles) that *natively fuse* (a) security control enforcement plus (b) continuous compliance mapping and auditor-ready evidence in one end-to-end system. This is an inference from product scopes, not a claim that such products do not exist.

SMB compliance automation gap — who’s not being served? (inference + evidence)

Both Vanta and Drata aim to “scale down” (startups/SMBs) and “scale up” (enterprise), but their go-to-market surfaces still suggest friction for the smallest buyers:

- Vanta requires a demo for pricing and positions multi-tier bundles. ⁶⁹
- Drata similarly describes plan structures and add-ons without list prices, and even its “Foundation” plan presumes a formal compliance program (“GRC program,” frameworks, trust center, vendor risk). ⁸⁴

Combined with third-party procurement ranges suggesting ~\$10k/year+ entry points for Vanta/Drata-style platforms [est.], the most plausibly underserved segment is **micro-SMBs** (very small teams, often outside B2B SaaS) that need lightweight security attestations, vendor questionnaires, or basic policy kits but cannot justify enterprise-style tooling cost/complexity. ¹¹²

In practical investor terms: if you define SMB as “<50 employees,” Drata explicitly packages a Foundation plan for that size range, but the true “gap” is often **below** that (e.g., 1–10 person firms, or non-tech SMBs) and in organizations with **low compliance maturity** that need guided, near-done-for-you workflows rather than configurable GRC platforms. This is an inference from packaging and required program structure, not a claim of intent. ¹¹³
